

CERTIFICATION OF FINAL ROOF INSPECTION

As a measure to ensure the safety of your home, a roof permit is required on all re-roof projects. The city of Rowlett provides a final roof inspection as a part of your roof permit. The Final roof Inspection consists of:

- Verification that your water heater and furnace exhaust vents are reinstalled properly. This will include verification that the vents have a one-inch clearance from all combustible materials (rafters, joists, roof decking, etc.) and that the vents are properly connected within the attic space. Failure to maintain a one-inch clearance is a possible fire hazard and failure of the vents to be properly connected may result in carbon monoxide build-up in your home.

Note: someone over 21 years of age must be home to allow the inspector access to the attic.

If the property owner chooses not to have the City of Rowlett perform this inspection, the property owner must certify that they have verified that all vents have been properly re-connected and all vents comply with the one inch clearance from any combustible materials. Please deliver this completed form to 5702 Rowlett Rd. Rowlett, TX 75089 or scan and email it to buildinginspections@rowlett.com. **If you choose to have the City perform the inspection, completion of this form is not necessary.**

Project Address: _____ Permit number: _____

- I am the property owner and I certify that I have completed a final roof inspection, consisting of an attic inspection, to verify all vent piping maintains a one-inch clearance from any combustible materials and all vent piping is properly connected.
- My home is all electric and does not have any gas appliances installed; therefore, no inspection is required.

***This form must be notarized if the Property Owner is requesting the waiver of the final roofing inspection by the City of Rowlett.**
