## News Release

**For Immediate Release:  
August 17, 2012**

**Denise Perrin | Community Relations Manager**

City of Rowlett | 4002 Main St., 75088 or P.O. Box 99 | Rowlett, TX 75030-0099  
o 972.412-6192 | c 214.876-9408 | f 972.412.6183 | dperrin@rowlett.com

**Ground spraying of the entire city to occur for three consecutive nights beginning Sunday, August 19 through Tuesday, August 21.**

***Fifth Rowlett resident tests positive for West Nile and additional mosquito tests positive.***

**ROWLETT, TX.** In an effort to control mosquitoes that could potentially carry and spread the West Nile Virus, **Dallas County will perform GROUND spraying for three consecutive nights beginning Sunday, August 19 through Tuesday, August 21, during the overnight hours between 10:00 P.M. and 6:00 A.M.,** weather conditions permitting. The ground spraying will encompass the entire City of Rowlett while the actual spraying area for the majority of the City will on be on paved public streets. *The entire City of Rowlett will be sprayed all three consecutive nights.*

A fifth confirmed Human case of West Nile Virus Disease in a resident of Rowlett has been reported by the Dallas County Health Department to Rowlett officials. The confirmed case was near the intersection of Cortland Circle and Halifax Drive in the 75088 zip code. A positive mosquito test was also reported by the County near the intersection of David Drive and Smartt Street, also in the 75088 zip code. Dallas County has indicated that they will spray in the paved alley easements in the Skyline and Llano Street area and in the neighborhoods near Halifax and Cortland east to near Smartt and David. Additional mosquito inspections will continue over the next few weeks.

Residents should stay indoors and avoid contact with the insecticide during the spraying period. Those who might come in direct contact should wash with soap and water. Motorists who pass spray trucks should remain in their vehicles with the windows up and the air conditioner off until the insecticide dissipates. Fish ponds should be protected and pets should be brought indoors.

Dallas County Health officials are working with the City of Rowlett to minimize the risk of residents of contracting mosquito borne diseases through education, inspections and abatement activities.

The City of Rowlett encourages residents to defend against West Nile and mosquitos by using the Four D's:

- **DEET** - Use insect repellents that contain DEET every time you are outside.
- **Drain** - Remove all areas of standing water. Check for clogged roof gutters as water can pool in debris and stand for long periods of time. Empty water from the drain collection dishes placed beneath potted plants. Change the water in birdbaths, wading pools and pet dishes daily. Inspect and repair French Drains
- **Dress** - Avoid mosquito bites by wearing long, loose, light-colored clothing at all times when outdoors.
- **Dusk/Dawn** - Stay indoors during the hours mosquitoes are most active.

For additional information on West Nile disease or mosquito breeding please contact the Dallas County Health Department at 214-819-2115 or on the internet at [www.dallascounty.org](http://www.dallascounty.org).
